

Dick Size (from God) (Without chip)

4/24/2026

* Your dick size can vary from size to size.

- My dick would normally be around ~~5.5~~⁶ inches when I used to have sex. And ~~about~~ 7 when jerking off some. (maybe bigger)
- My dick could get around 13 inches long by 6 inches in diameter
 - We ^{can} never fuck with this dick (hardly ever).
- A great dick size is like 9.37^{inches} long by 6-6.5 in circumference

that is a great size.
- My DNA gets switched around a lot.
- You can change the size of your dick + ~~vag~~ Vagina, eventually.
 - You have to get certified later.
 - You'll change your DNA to do it.
- A lot of peoples' dicks are bigger, they just don't grow to their actual size. (bigger) (or so)
- You can give as many orgasms as you wish, but 3 is fulfilling.
