

* Doing shit through me
does not make it good!

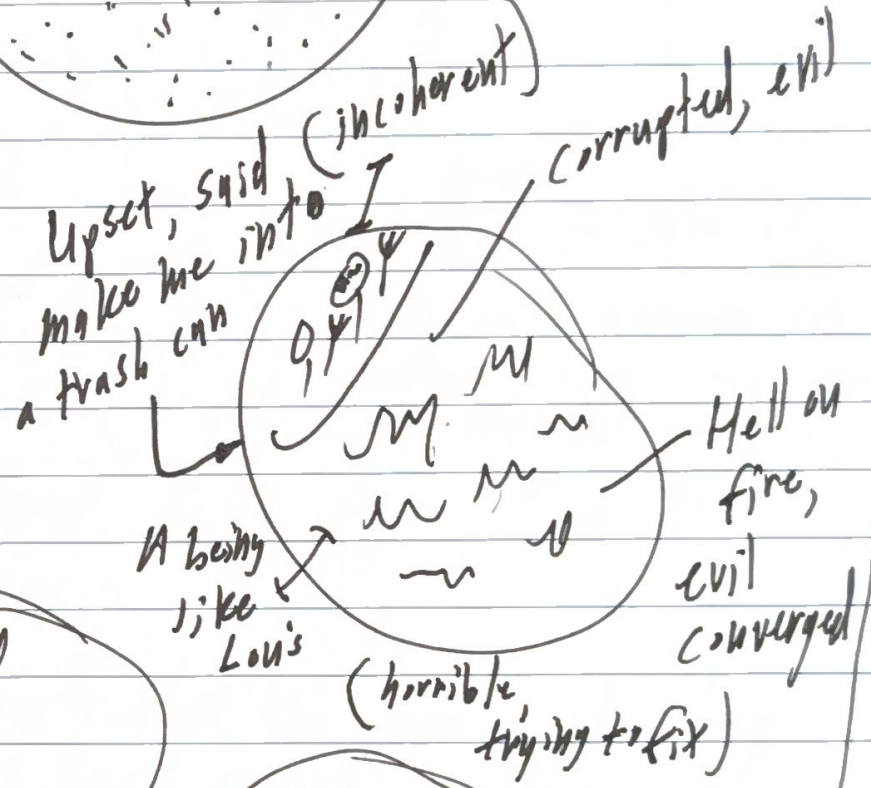

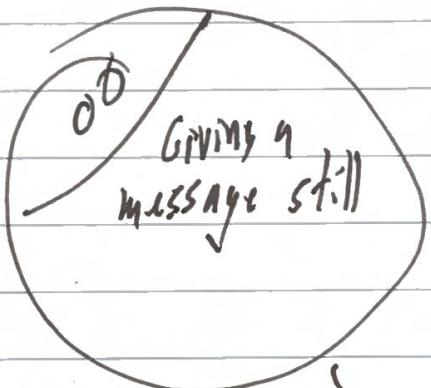

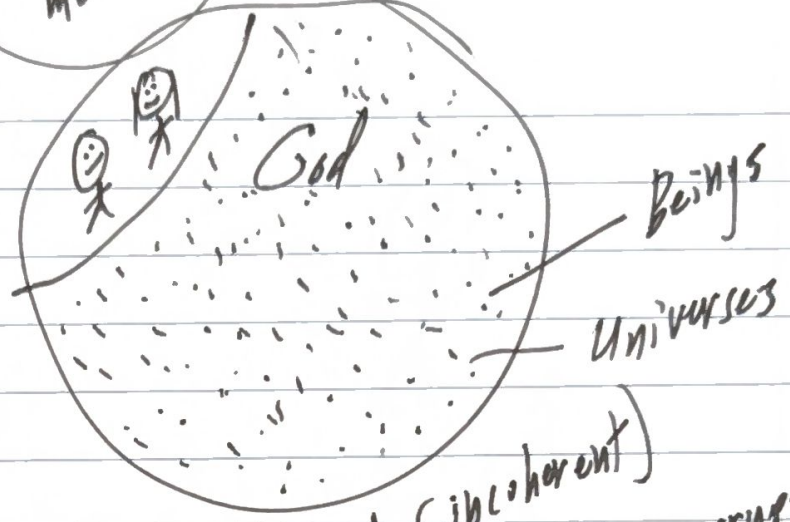

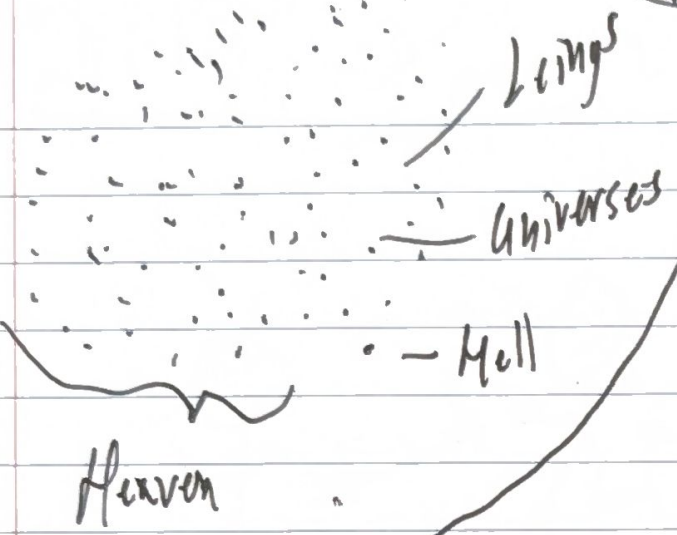

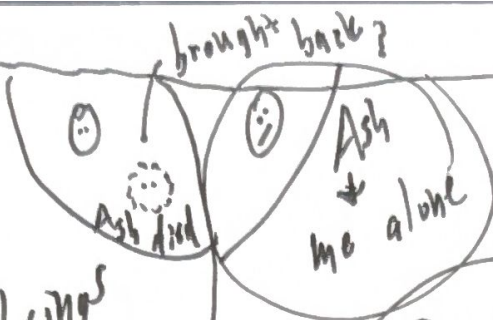

Not all the beings in me
are good.

• They will be punished for
their crimes

God & Heaven

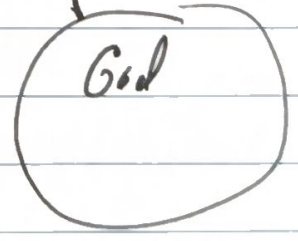

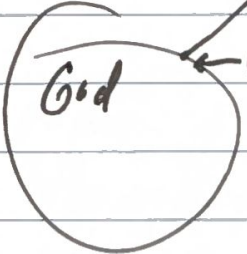

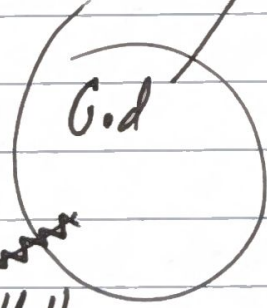

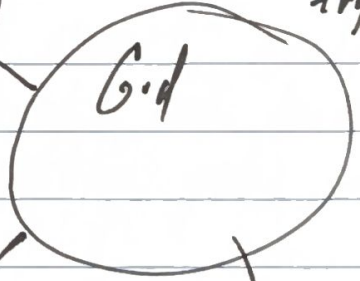

JA (God) ~

die, cause mad

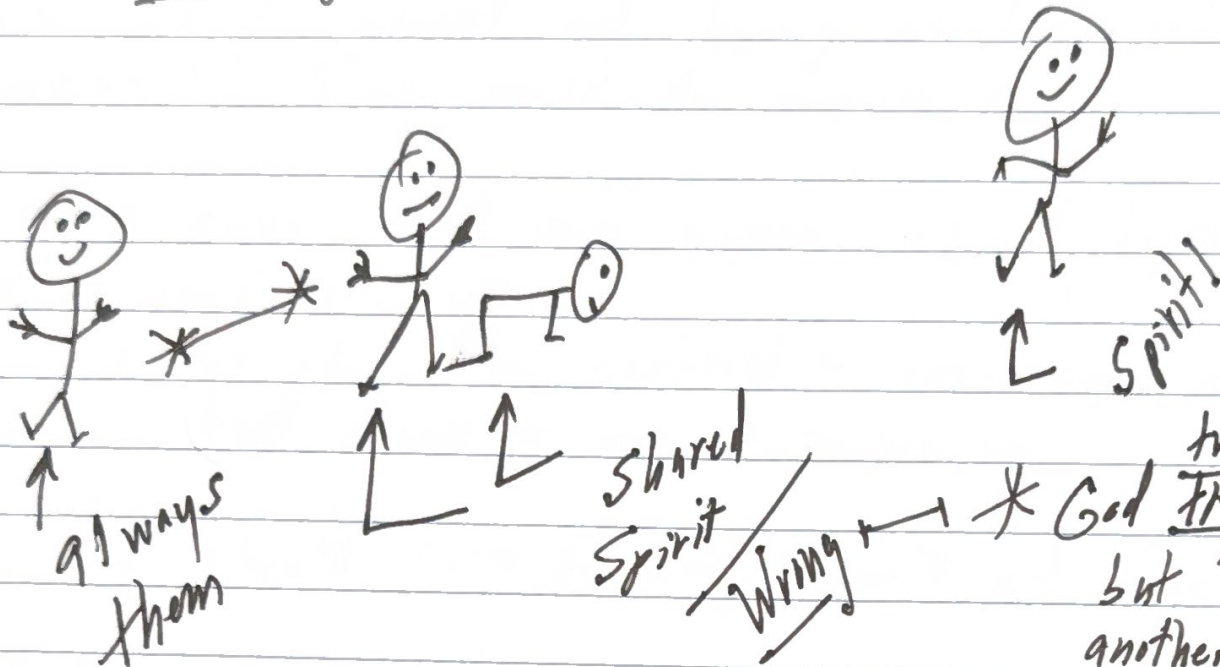

A being like Louis

JA
been in Hell
for 663 million years
• Eternal fire is real (science)

Images

* God ^{tries} ~~trys~~ to save us,
but can't because you loved
another image other than
the intended image.

Your Image (body) is a sacred Being from God to
make you perfectly happy.

Your Soulmate is made perfectly for you, but they
may not be: fun, good looking, smart, healthy, etc.
• However, you will be all these things and more with
the help of God. As soon as Ashley gets with me.

What is saved?

- Parts of it comes from other sex acts of you and
your soulmate; maybe through time, maybe not.
- You cannot alter the memories.

You worship other Gods images when you have
sex with other people that are not your soulmate's.
• You shall not worship other Gods before me!

4/9/2026

Would people accept not having freedoms and/or complete freewill? They could do massive damage.

Science says what can happen, should happen.

- God says otherwise.

- We should be certified & guaranteed to not hurt others & use it responsibly.

Also, we should have freedom/freewill at the same time.

Humans • We don't need chips. because God provides protection outside want of science that other beings can't access.

- Otherwise other beings can access them.

We should not access information if we can.

- We should know better.

watch me through

Sacred things: Memory → Soul → Life stored.
Mind → Soul.

Body → vessel of your soul.

Spirit → from God → Unhackable (exists), but was unknown.

- Outside of science (absolutely).

→ Unreachable realm.

There is no difference, hardly, between someone that can last during sex versus someone that can't. It is a gift from God. Everyone will last with their soulmate.
